Murdoch
MECHANICAL ARM

Nathanson Liver Retractors are specially designed to fully support and retract the liver during laparoscopic upper GI surgery in order to improve the view of the operating field.

The shape of the stainless steel device evenly distributes the weight load, and the anodized steel eliminates reflections. The retractors come in two sizes and can be resterilized by steam autoclave.

Order Number	Reference Part Number	Description	Distal tip distance mm
G03123	NLRS-1001	large	75
G03395	NLRS-1002	extra large	95
